

# BEATISER VS-15

## Detailed Product Description

For exceptionally high SPL applications, the VS-15 combines Beatisers coaxial, point source, constant directivity drive unit. This delivers extended frequency response with high sound pressure levels, outstanding clarity, crystal clear intelligibility, definition and detail. A system optimized for use where such higher output levels are required for live sound reinforcement, high quality public address or large scale music reinforcement installations.

Efficiency and performance are clearly top of the list of advantages offered by these powered loudspeakers. By eliminating speaker cables and tailoring the signal processing and enclosure system response, the VS-15 offers increased output and reduced distortion for each watt expended.

A immensely powerful package of high output and intelligibility provides the solution for high quality music and speech reproduction, this versatile loudspeaker also has, due to effective acoustic matching to the other VS Series models, a wide range of applications in larger installations, including nightclub infill, theme bars, performing arts centres, high quality public address, theme parks, leisure venues, audio visual, houses of worship and dry hire rental.

## **Model: VS-15**

System: coaxial loudspeaker system

Frequency response ( $\pm 3\text{dB}$ ): 52Hz~18 KHz

Driver quantity: C1575-44

LF: (15in)  $\Phi 75\text{mm}$  voice-coil

HF:(1.7in)  $\Phi 44\text{mm}$  voice-coil

Nominal Impedance: 8ohms

System sensitivity (1w@1m): 99dB SPL

Maximum SPL: 127dB

Power handling: 300W

Peak power: 600W

Nominal Coverage angle (H x V): 80°x 80°

Dimensions (W x D x H):450x420x590mm/PCS

Connectors: 2xSpeakon| connectors (NL 4)

Enclosure material: 18mm MDF

Finish: Textured black paint

Grille: Black perforated steel

Suspension system: fly track

Net weight: 27Kg

Shipping size:515x505x655mm/0.17CBM/PC
